# **4K Output Resolution**

Equipped with 4K resolution, the PTC330UV2 provides ultra-precise auto tracking. The PTC330UV2 also features a Sony sensor that maintains a truly impressive video performance through every frame of your production.

## **30X Optical Zoom**

The zoom power of the PTC330UV2 camera reaches an incredible 360X (including 12X Digital Zoom). It works even while the camera is panning and tilting, allowing you to highlight content and rapidly change shooting angles. Operate a closer and clearer video feed with the unbeatable PTZ performance of the PTC330UV2.

### **Human Detection AI**

Welcome AVer's most advanced AI tool yet—Human Detection. This highly accurate processing function enables PTC330UV2 to easily detect and capture human forms and moving objects in seconds. Never miss a tracking target again.

#### **Click & Track**

Redirect focus in an instant with the PTC330UV2. Simply click on a target to quickly adjust the shooting angle and initiate precise tracking. This advanced feature is easy for anyone to operate via both remote control and intuitive Web UI.

#### **Presenter Mode**

Track your target everywhere with Presenter Mode. This feature gives presenters the flexibility to leave the stage and interact with the audience, all while being continuously tracked. The camera stays locked on its target, even if other people or objects get in the way.

### **Zone Mode**

Zone Mode enhances your ability to capture content on multiple displays. Create up to four content zones to steadily capture the content on display rather than the presenter's movements.

## **Hybrid Mode**

Hybrid Mode provides the utmost freedom of movement for performing artists. Preset effective areas for Zone Tracking in advance, and once you step into those areas, you will be targeted together with the content. When you are outside, you are just like in Presenter Mode.

#### **Product Specifications**
